

Disc mowers **ALKA** are used for mowing of all kind of green crops for direct feeding, hay or further processing. They are characterized by high working speed, high efficiency and low power demand. Rakes narrowing swath width allow free tractor's passage without pressing mowed green fodder with wheels. Available working widths [m]: 2,10; 2,25; 2,80.

Standard equipment:

- Driveshaft
- Hydraulically folding for transport
- Polyurethane fuse
- Set of working knives
- Oval shape of working disc
- Slide for swath forming
- Overload protection system for working bar

Mowers **ALKA XL** and **XLC** are modern, professional machines used to mow all kinds of green crops for direct feeding, hay or silage. They are characterized by high working width, efficiency and low power demand. Unique terrain copying system guarantees harvest of high quality pasture without pollution and fast grass regrowth. In rear (XL) and front (XLC) tandem they are an ideal set for great and demanding farms which value quality, efficiency and time.

Standard equipment:

MOWERS ALKA XL (side, rear)

- centrally suspended mower
- disc working bar
- special terrain copying system
- overload protection system for cutting bar
- levelling cylinder making attaching the machine easier
- hydraulic system for folding for transport
- slides for swath forming
- driveshaft included

MOWERS ALKA XLC (front)

- centrally suspended mower
- disc working bar
- special terrain copying system
- overload protection system for cutting bar
- slides for swath forming
- driveshaft included
