

Seeders **ERA** are designed for precise, mechanic seeding of maize, soy-bean, sorghum, sunflower seeds, bean etc. Heavy disc seeding system provides universal use regardless of kind of soil and its preparation for seeding. ERA can be used in both reduced and conventional sowing. Seeders ERA always provide optimal working depth of seeding.

Standard equipment:

- mechanical seeding system
- hydraulic marker trigger of passage traces
- individual fertilizer dispenser for each section made of plastic or two tanks made of acid-resistant tin
- seeding section with disc plate
- fertilizer disc coulters
- precise control of sowing depth and pressing of seeds

Technical specification:

| TYPE | ERA 6 PLUS | ERA 8 PLUS |
|---|---------------|---------------|
| Working width [m] | 4,2 | 6,0 |
| Number of sections [pcs] | 6 | 8 |
| Capacity of one tank for seeds [dm ³] | 80 | 80 |
| Capacity of one tank for fertilizers [dm ³] | 75 | 75 |
| Distance between rows [cm] | 50÷80 | 50÷80 |
| Distance between seeds in row [cm] | 14÷27* | 14÷27* |
| Power demand [HP] | 100÷120 | 120÷150 |
| Efficiency [ha/h] | 2,1÷4,2 | 3,0÷5,0 |
| Working speed [km/h] | 5÷10 | 5÷10 |
| Mass [kg] | 1620 | 2 050 |
| Price [EUR] | 22 800 | 26 000 |

* 14 cm for 91 thousand seeds/ha
27 cm for 49 thousand seeds/ha

Additional equipment:

| | |
|--|-----------|
| Working carriage for semi-mounted version, for tractors with min. power demand 80 HP | 2 600 EUR |
| Transport assembly | 3 200 EUR |
