

Light cereal seeder with traditional mechanical seeding system, characterized by uncomplicated, firm construction, easy to operate. It is used especially in small acreage farms. Equipped with foot coulters, it should be used on light and medium-firm soil. Seeder with rich standard equipment.

Standard equipment:

- foot coulters
- hydraulic side marker trigger
- mechanical technological paths closing system
- central and individual pressing of coulters
- stepless transmission
- tractor's track looseners
- shelf for cereal
- loading platform
- border disc coulters
- leveling fingers

Technical specification:

TYPE	FAMAROL 3/350
Working width [m]	3,0
Number of coulters [pcs]	25
Coulters type	Fußschar
Distance between rows [cm]	12
Seeding depth [cm]	0÷6
Capacity of seed-box [dm ³]	350
Power demand [HP]	41
Mass in standard version [kg]	400
Efficiency [ha/h]	2,2
Price [EUR]	4 550
