

FORMA 2,4

Ridgers with forming device

2- and 4-row ridgers designed for mechanical caring for plantations of potatoes planted in 75 cm distance between rows. Ridgers destroy weeds and soil crust and give ridges trapezoid shape, what in total creates very favorable conditions for growth of potatoes.

Standard equipment:

- forming device
- adjustable inclination of forming device
- demountable forming tin (for treatment of ridgers after risings)
