

Seeders **KRUK** designed for mechanic sowing of seeds of small vegetables such as: onion, carrot, radish, lettuce, beetroot, cucumber etc. Available mounted as well as manual versions. **KRUK** has mechanic-bed seeding system. There are eight sets of different spoons in standard, which should be chosen according to seeds' caliber. Seeding body is made of aluminum – it prevents electrifying the seeds. Single- or double-row sowing is possible.

Standard equipment:

Manual version:

- marker of passage traces
- sowing body made of aluminum
- 8 sets of seeding spoons
- chain drive from front copying wheel
- openwork copying wheel
- set of rack wheels
- raking chain

Mounted version:

- number of sections from 2 to 12
- carrier frame with width of 1,80÷6,00 m
- adjustable rubber support wheel
- three-point suspension system
- bodies made of aluminum
- 8 sets of seeding spoons
