

Mounted spreaders

Spreaders from **MXL series** are an offer for medium and large farms. Connecting of SDS spreading system ie: amount of spreaded fertilizer adjusted through worm conveyor and multi-functional controller allows full control of spreading fertilizer and guarantees unprecedented precision in amount of spreaded fertilizer. Spreaders from MXL series can also work with GPS system.

Standard equipment:

- indicator of worm conveyor rotations
- canvas cover (MXL 2100÷3000)
- sieves with opening on both sides
- inclination indicator of the spreader
- spreading and adjustment desk
- border spreading plate
