

P is a agricultural two-axle trailer designed for transporting bulky and loose materials. The trailer is equipped with rear wall with adjustable bolt, which allows to dose loose materials. Hydraulic installation and movable borders allow to unload from three sides. Trailer is also equipped with rear hitch which allows to hook another trailer.

Standard equipment:

- Triangular towing bar with adjustable holding spring and eye $\varnothing 40$
- Double-line pneumatic braking installation with automatic braking force regulator
- Lightning installation
- Rear manual hitch
- Rear hydraulic jack
- Rear connector of brake installation
- Tipping installation with shut-off valve
- Telescopic cylinder for three-side tipping with joint sling
- Chute baffle for grain in rear wall
- Rear electrical socket
- Wedges for wheels with pouches
- Rear wheels mudguards
- Border ladder and steps to make accessing container easier
