

Special platform PL-6 was constructed in order to transport agricultural machinery of unusual dimensions on roads. Platform is lowered to the ground level for loading, and is risen for transport by hydraulically controlled axle from Tractor's cabin.

### Standard equipment:

- strong reinforced frame with the central load-bearing pipe
- slant hitch – beam cat. II and III
- mechanic transport blocking
- handles for straps on both sides
- wooden planks of 40 mm thickness
- lightning plate
- 1- or 2-line pneumatic braking system, hydraulic

### Technical specification:

TYPE	PL-6
Pallet size [m]	6,0×2,4
Capacity [kg]	5 500
Tyres	12,5/80×15,3
Platform size [m]	9,00×2,48
Mass [kg]	1 700
Price [EUR]	<b>6000</b>

### Additional equipment:

Add-on device for carrying bales (Surcharge)

**1000 EUR**
