

Conventional seeder with mechanical row seeding system. Large seed hopper based on massive carrier frame allows problem-free loading from BIG BAG. Options of using foot coulters, alternating disc coulters and alternating disc coulters with pressing-and-copying set make adapting the seeder to individual customer's needs easier.

Standard equipment:

- foot coulters on pipe carrier (Polonez)
- two-shield alternating self-cleaning disc coulters
- hydraulic marker trigger
- electric technological paths
- tyres 6×16 (version 3/550)
- tyres 10×15 (version 3/900, 4/780)
- loading platform with steps
- two-part integrated seeding wheels for grain and rape
- stepless transmission box with oil
- central hydraulic pressing of coulters
- central adjustment of coulters' work depth
- levelling fingers with individual pressing of working springs
- grating inside the hopper which makes loading easier
- device for the "motoring test"
- central control of position of bottoms
- tractor's track looseners

Technical specification:

TYPE	POLONEZ 3/550	POLONEZ 4/780	POLONEZ 3/550 D	POLONEZ 3/900 D	POLONEZ 4/780 D
Working width [m]	3,0	4,0	3,0	3,0	4,0
Mass [kg]	680	920	815	870	1100
Number of coulters [pcs]	29	35	25	25	31
Efficiency [ha/h]	2,5	3,2	2,5	2,7	3,2
Capacity of seed-box [dm ³]	550	780	550	900	780
Power demand [HP]	60	80	60	80	80
Price [EUR]	6 700	9 000	8 700	9 800	11 250

Additional equipment:

Pressing-and-copying set 3,0 (version D)	1 430 EUR
Pressing-and-copying set 4,0 (version D)	1 800 EUR
Pre-rising technological paths	850 EUR
R11 computer	1 150 EUR
