

Seeder with mechanical row seeding, which should be used for seeding at light and medium-firm soil. Poznaniak can be equipped in light foot coulters or double disc coulters in “V” arrangement depending on soil conditions. Additional equipment allows completing a seeder consistent with customer’s individual needs.

### Standard equipment:

- foot coulters on pipe carrier (POZNANIAK)
- two-shield disc coulters in “V” arrangement (POZNANIAK D)
- manual marker trigger
- tyres 175×13
- one step loading platform
- universal split seeding wheels
- central and individual pressing of coulters
- levelling fingers with individual pressing of working springs
- grating inside the hopper which makes loading easier
- device for the “motoring test”
- central control of position of bottoms
- border disc coulters behind wheels
- tractor’s track looseners

### Technical specification:

TYPE	POZNANIAK 3/410	POZNANIAK 3/410 D
Working width [m]	3,0	3,0
Capacity of seed-box [dm <sup>3</sup> ]	410	410
Number of coulters [pcs]	27	25
Efficiency [ha/h]	2,5	2,5
Power demand [HP]	60	60
Mass [kg]	490	630
Price [EUR]	4 850	6 350

### Additional equipment:

Hydraulic side marker trigger	950 EUR
Electric technological paths	550 EUR
R11 computer	1150 EUR
