

SPAIDER is light, efficient easy to operate machine used for efficient tedding of previously mowed material. It spreads processed material regardless of its quality and type. It is hardly sensitive to difficult field conditions.

Standard equipment:

- Four working rotors
- Hydraulically foldable for transport
- Adjustable spreading angle
- Adjustable working width
- Pneumatic copying wheels

Technical specification:

TYPE	TEDDER SPAIDER
Working Width [m]	5,50
Transport Width [m]	2,95
Transport Height [m]	3,2
Number of arms [pcs]	4×7
Efficiency [ha/h]	10
Power demand [HP]	40
Mass [kg]	630
Tyres	16×6,50-8
Inclining adjustment	4-positions, 12÷17°
Number of rotors [pcs]	4
Diameter of rotors [m]	1,75
Price [EUR]	5 000

Additional equipment:

PTO shaft

175 EUR
